

## PHILADELPHIA EAGLES NFL TEAM GOES LIVE WITH BIRDDOG EYES P200 AND NDI®

When there are millions of fans around the world hanging on every word of the Philadelphia Eagles Head Coach, Doug Pederson, it's critical that the gear just works. David Sullivan, Head of Broadcast Engineering at the Eagles, turned to BirdDog's P200 PTZ Camera at the start of the 2019 Training Camp. The P200 will form an integral part of the live streams to let the fans know the ins and outs of the team in the lead up to the regular season.

*“The P200 has really impressed us. With full NDI video the image quality is remarkable and having video, power, tally, and control all over a single Ethernet cable makes it super easy to setup,” says David, “for the first press conference we didn’t even have time to balance the camera so we used it in auto mode and the pictures looked great.”*

There are also plans to roll out a BirdDog Eyes A200 all-weather NDI® camera to be mounted at the 50 yard line and used as a safety wide shot for the in-stadium show.

*“With its IP67 rating and one cable for power, video, and control the A200 is perfect for our plans to install permanently inside the stadium,” continued David, “We’re really excited about the flexibility NDI gives us and we really love what the technology is heading.”*
