

Present, organize, and secure your best work

The world's leading content creators rely on SHIFT.
Now you and your team can, too.

Present your best work

Create beautifully branded reels, sites, presentations, or individual portfolios — no coding required. Share with a private audience or publish it to the world.

Studio-grade security for creators

Secure your content with personalized watermarking, private sharing, custom user permissions, and password-less login.

Manage videos, images, documents, and more

Organize your work in progress to easily find, review, share, and manage your videos, images, documents, and more.

Integrate with your existing tools

Connect your production workflows with tools you're already using via Zapier, the SHIFT Adobe Panel, or our native API.

Organize, secure, and share your team's work

Review from anywhere

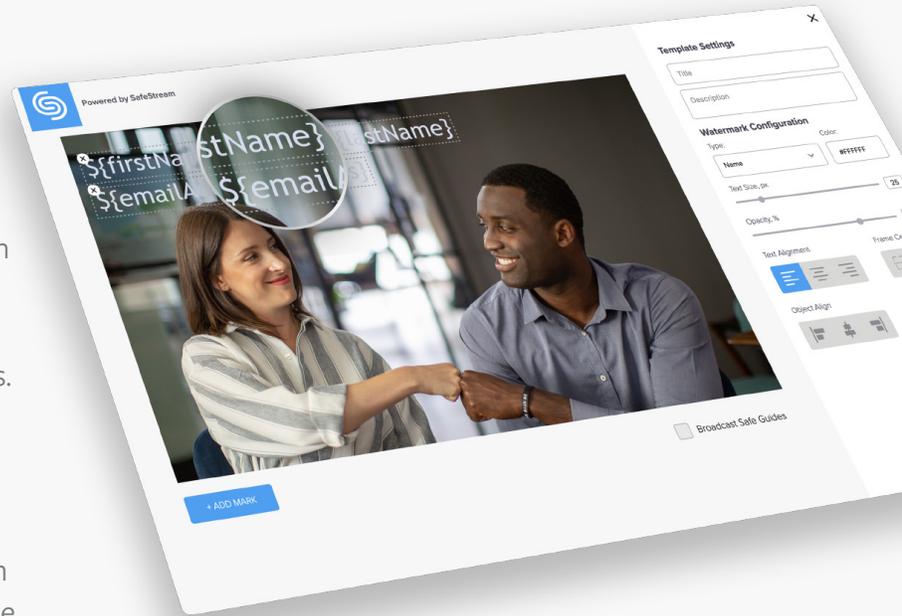

Collaborate with your team from anywhere, on phone, or desktop. Annotate on screen, leave frame-accurate comments, browse different versions, and give the green light with approvals.

Internal and external sharing

Control access to your shared content with private links, password protection, and custom link expiration. With granular link reporting, see real-time updates on comments, downloads, approvals, and views.

Organize your work beautifully

Keep your files organized with custom metadata and tags, and keep your content library secure with project-based user permissions.

Real-time, personalized watermarking

SafeStream is the only real-time content security technology of its kind, protecting against content theft and leaks through personalized visible and forensic watermarks.

For teams of any size, SHIFT scales with you

FOR CREATORS

Free

Store up to 50 GB for free and enjoy unlimited comments, shares, and collaborators.

FOR TEAMS

Starting at \$249/month

Make your creative process even more productive and efficient.

FOR ENTERPRISE
